Table 1 2025-26 Rainfall Record

April 2026 Depth-to-Water (DTW)

The average DTW measurements District-wide in the 24 monitoring wells on April 21, 2026, was 13.41 ft. DTW averages are about 3 ft. worse than March of 2026. The DTW averages in the five drought monitoring wells reported an average of 15.43 ft., which is 2.3 ft worse than March of 2026. DTW averages are 1.1 ft. worse than April 2025, and 3.13 ft better than a drought year like April 2021.

Figure 2 Average Depth-To-Water Chart

Following the Water Shortage Contingency Plan, March 31, 2026, was the most recent water shortage evaluation date. Rainfall totals at that time were (32.5") 96% of average for the rain year to date, indicating there is no water shortage within the District currently. May 31, 2026, is the next water shortage evaluation date.

Groundwater Management Notification for the Month:

0-Overage notification letters were mailed out for the month.

10-Violation 1 letters for failure to report a water meter reading

0-Violation 2 letters for failure to report a water meter reading for two consecutive months

0-Violation 3 letters for failure to report a water meter reading for three consecutive months
