Table 1 2026-27 Rainfall Record

October 2026 Depth-to-Water (DTW)

The average DTW measurements District-wide in the 24 monitoring wells on October 20, 2026, was 20.08ft. DTW averages are about 1.25 ft. lower than September of 2026. The DTW averages in the five drought monitoring wells reported an average of 22.77 ft., which is 0.78 ft lower than September of 2026. DTW averages are about one (1.6) foot lower than October 2025.

Figure 2 Average Depth-To-Water Chart

Following the Water Shortage Contingency Plan, May 31, 2026, was the most recent water shortage evaluation date. Rainfall totals at that time were (36.3") 96% of average for the rain year to date, indicating there is no water shortage within the District currently. January 31, 2027, is the next water shortage evaluation date.

Groundwater Management Notification for the Month:

1-Overage notification letter was mailed out for the month.

12-Violation 1 letters for failure to report a water meter reading

0-Violation 2 letters for failure to report a water meter reading for two consecutive months

0-Violation 3 letters for failure to report a water meter reading for three consecutive months
